ColorStep | Fast ELISA with Colorful Reagents

ColorStep ELISA Kits are engineered for scientists who need results fast. With total protocol times of just 90–120 minutes, only 1–2 wash steps, and intuitive color-coded reagents, ColorStep removes complexity and speeds up your workflow without compromising performance.

These kits come pre-coated and ready-to-use, eliminating prep time and reducing the risk of pipetting errors. Requiring just 50 µL of sample, ColorStep is ideal for limited or precious materials. With <6% CV, robust recovery, and over 1,700 kits spanning multiple species, ColorStep delivers high-quality, reproducible results - faster, simpler, and smarter.
