# DO YOU NEED SOME TLC PLATES?

Introducing our latest addition:

a fresh lineup of TLC plates, launched towards the end of last year by

our partner

APOLLO SCIENTIFIC Supporting Discovery

These plates have been earning accolades and are offered at an unbeatable price point!

# **High-Quality Materials**

Made from high-quality materials, ensuring consistent and reliable results in chromatographic experiments.

# **Low Metal Content**

Minimal metal content, reducing the risk of contamination and interference with your samples. This is a must for accurate research.

#### **<u>High Temperature Resistance</u>**

Designed to withstand high temperatures. Suitable for a wide range of chromatographic applications, ensuring you can tackle various research challenges with ease.

# **Uniform Particle Size**

Manufactured using high-purity powdered silica gel and coated with precision using specialised equipment, ensuring a uniform particle size.

This is crucial for superior separation in chromatography.

# **Multiple Options**

A large variety of over 70 varieties of TLC plates coming in a range of sizes.

# **Efficient Separation of 16 Substances**

Designed for efficient separation, enabling you to work with up to 16 different substances in a single experiment.

Don't miss out on our incredible promotion, featuring discounts of up to 85% on select items. Check out the complete list on the reverse side.
