Axygen® Strip and Individual PCR Tubes

For standard and real-time PCR

Individual tubes are available with attached caps or without a cap

Strip tubes are available with attached or unattached caps

Axygen PCR tubes are ideal for standard and real-time PCR applications. Our strip and individual tubes feature thin walls for precise thermal transfer and tight-fitting caps for a leakproof seal. Choose from a variety of configurations and cap styles.

Strip Tubes with Attached Caps

- Designed to fit a wide variety of thermal cyclers
- Precisely aligned caps prevent evaporation and allow for easy opening and closing
- Strong plastic connections between the tubes prevent separation
- Numbered caps for easy identification
- Available with domed or flat caps

Strip Tubes with Unattached Caps

- Designed to fit a wide variety of thermal cyclers
- Even insertion cap ensures a tight fit to prevent evaporation
- ▶ Choice of 0.1 mL or 0.2 mL capacity
- Available with a domed, flat frosted, or flat clear caps for qPCR

Real-time Optimized Strip Tubes with Unattached Clear Caps

- Designed for low sample volume reactions
- Ideal for 0.1 mL thermal cyclers
- Low profile design has less dead air volume, which reduces reaction times and evaporation
- Recommended volume range of 5 μL to 125 μL
- Available in white or clear

Individual Tubes

- Designed to fit standard 96-well blocks
- ▶ Even insertion cap ensures a tight fit to prevent evaporation
- Available without a cap or with flat or domed individual caps

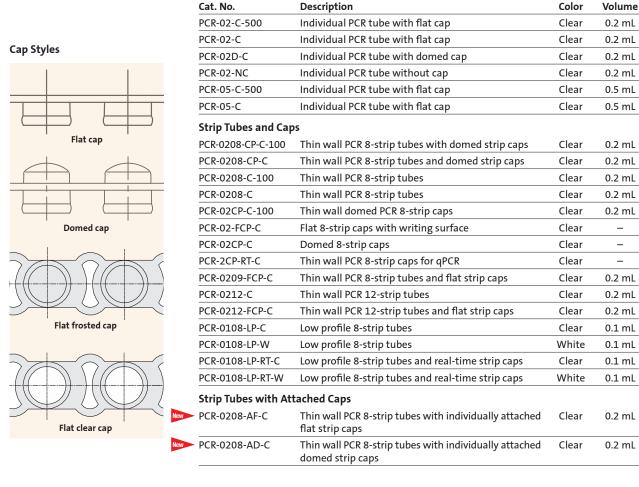

Features of all Axygen PCR Tubes

- Polypropylene
- ▶ RNase-/DNase-free
- Nonpyrogenic
- Nonsterile
- PCR inhibition-free
