

# CAPP *Aero* 384

## The perfect multichannel pipette for 384-well plates!

Lightweight and ergonomic construction

Ideal for PCR, micro array, or MALDI spectrometry technique

Optimizes your workflow, saves your time and increases your throughput

A great back-up unit for automated systems, enabling quick and highly precise pipetting into 16-, 48- or 64 wells at once!

Consistent and reliable liquid transfer

Available in 16-, 48- and 64-channel versions

### Try **EX PelIPLUS 384** Pipette Tips!

- High quality, low retention tips
  - Ideal for **CAPP Aero** 16-, 48- and 64-channel pipettes
- Extremely smooth inner surface virtually eliminates sample retention
  - Minimal binding of DNA, RNA and Proteins
- Filter version available, which prevents cross contamination due to aerosol formation (such as DNA), or dangers from toxic, infectious, radioactive or other hazardous materials
