

Corning® Step-R™ Repeating Pipettor and Syringe Tips

CORNING

Corning Step-R

The Corning Step-R is a repeating pipettor suitable to dispense volatile, dense, viscous, or foaming liquids, and for all applications where long dosing series are required. It works with 8 syringe tip sizes to dispense doses from 1 μ L up to 5 mL. The lightweight construction, ergonomically shaped handle with a finger hook allows for single-handed volume setting, fast syringe tip filling, and convenient serial dispensing. The Step-R has a precise stepping mechanism to ensure repeatability of all dispensed doses, and the positive displacement allows for contamination-free operation.

Each device is tested for functionality and precision according to EN ISO 8655 and is supplied with an individual QC certificate.

Features

- ▶ Easy volume setting: Volume selection chart conveniently located on the device
- ▶ Fast and precise multiple dispensing: Up to 48 pipetting doses without refilling the tip syringe
- ▶ Wide range of polypropylene syringe tips: 8 different sizes, sterile and non-sterile versions available
- ▶ Positive displacement syringe tips: Dedicated to work with high density or vapor pressure liquids such as glycerol or ethanol
- ▶ Maintenance-free
