

**Apollo Scientific**

High quality fluorochemical products, organic intermediates and biochemical reagents. Also wide range of Biochemicals.

**Dr. Ehrenstorfer**

Global leader producing pesticide reference standards that offers as well high quality reference materials for food and environmental analysis. (member of LGC group)

**Link Technologies**

High quality reagents for oligonucleotide synthesis and modification.

**Silicycle**

Functionalized silica gels, for heterogeneous catalysis and for metal scavenging, SPE cartridges and well plates, flash cartridges, silica gels, TLC plates and SPE cartridges.

**TCI**

Leading global manufacturer of fine chemicals for research and industry.

**Biosolve**

Ultra pure reagents for molecular biology and electrophoresis. Peptide, DNA & RNA reagents and solvents for synthesis up to production. High purity reagents, formulations & solvents.

**Fisher Chemical**

High quality reagents, solutions and solvents for the most analytical purposes: pH, volumetric analysis, ICP/AAS. A Thermofisher Brand.

**Mikromol**

A range of more than 5,000 pharmaceutical API, impurity and excipient reference standards, each comes with a comprehensive Certificate of Analysis ensuring its suitability for both qualitative and quantitative analysis. (member of LGC group)

**SpiroChem**

Specialized in the design, synthesis and production of novel building blocks for use in drug discovery.

**Thermo Scientific™ - Acros Organics**

Broad range of fine chemicals for research, development and production.

ThermoFisher consolidated their product portfolio and transitioned the Acros Organics™ brand to the brand Thermo Scientific™.

**Combi-Blocks**

Combination building-blocks, organics and fine chemicals.

**Fluorochem**

Fluorinated products, heterocycles, boronic acids, sulphur compounds, novel organics, organometallics, silanes and siloxanes.

**Reagecon**

Largest product range of chemical standards and reagents in the world for analytical chemistry.

**Strem**

Metals, inorganics, organometallics and catalysts.

**Thermo Scientific™ - Alfa Aesar**

Fine organics and research chemicals, including boronic acids and esters, aryl homopiperazines, zeolites and fluoroaromatic compounds. A Thermofisher Brand.

ThermoFisher consolidated their product portfolio and transitioned the Alfa Aesar™ brand to the brand Thermo Scientific™.

**Thermo Scientific™ - Maybridge**

Innovative chemical building-blocks and screening compounds for the drug discovery industry.

ThermoFisher consolidated their product portfolio and transitioned the Maybridge™ brand to the brand Thermo Scientific™.

**Toronto Research Chemical**

Research chemicals and Analytical standards including APIs, impurities, metabolites, stable labelled isotopes and controlled substances (member of the LGC group).
