

**AssayGenie**

Core technologies include highly validated antibodies that power their best-selling ELISA, multiplex immunoassays and therapeutic antibody monitoring kits. In addition, a range of cell-based and biochemical assays was recently launched.

**Biotium**

Leading provider of innovative fluorescence detection technologies and products for life sciences research.

**Capricorn Scientific**

Capricorn Scientific was established in 2013 as a German manufacturer of cell culture media, sera, and reagents. The main focus of their production is the manufacturing of high-quality animal sera as well as serum-free media for biotech, diagnostic, and research applications.

Advantages at a glance:

- Secured just-in-time deliveries
- Reliable homogeneity for consistent results

**Corning Media**

High performance cell culture media, sera and reagents for research and biopharmaceutical production needs.

**Falcon**

High-quality disposable plastic ware for liquid handling and cell culture products. A Corning Brand.

**Becton Dickinson**

Extensive portfolio of microbiology solutions designed to make your laboratory run more efficiently and effectively.

**Cambridge Isotope Laboratories, Inc.**

Cambridge Isotope Laboratories, Inc. is the world's leading producer of stable isotopes and stable isotope labeled compounds.

**Cayman Chemical**

Large range of assay kits, biochemicals, antibodies and proteins for research in cancer, apoptosis, oxydative injury and much more.

**Cusabio**

Wide range of antibodies, ELISA kits and proteins.

**Fisher BioReagents**

End-to-end solutions for molecular biology, protein chemistry and cell biology. A Thermofisher Brand.

**Biopredic**

Human & Animal primary cells, cell lines, tissues for research, drug discovery & development, pharmacology & toxicology.

**Canvax**

Expert in Molecular Biology and GPCR expression in heterologous cells.

**Condalab**

Condalab, ex. Pronadisa ! Dehydrated culture media for microbiology & molecular biology and a complete range of high quality agaroses.

**Eurobio**

Molecular and cell biology products.

**Innovative Cell Technologies**

Producer of the well known Accutase and Accumax reagents for cell culture.

**Interchim Bioscience**

30'000 products for immunology, proteomics, biochemistry, genomics, cell biology & applied biosciences assays.

**Liofilchem**

Products used in diagnostics for clinical and industrial microbiology.

**NZYTEch**

NZYTEch produces premium-grade enzymes, mixes, and kits specifically designed for molecular research and diagnostics.

**Polysciences**

Microspheres & particles, polymers & monomers, electronic chemicals, life Sciences products.

**SERVA**

Supplier of high quality biochemicals, electrophoresis, life science and bioseparation products.

**Jackson ImmunoResearch**

Specialist in secondary antibodies.

**Microbiologics**

Leading producer of lyophilized microorganisms for quality control in microbiology laboratories.

**PAN Biotech**

Complete range of sera, serum free systems, media and reagents for cell culture.

**Pro-Lab Diagnostics**

Manufacturer of products for immunodiagnostics area.

**Thermofisher BioProduction**

Variety of peptones and yeast extracts that enhance cell culture media formulations to improve yield and reduce variability in biopharmaceutical applications.

**LI-COR**

Leading innovator in development of near-infrared fluorescence detection systems and tools for protein research, plant research, drug discovery and small animal imaging.

**National Diagnostics**

Chemicals and reagents for Electrophoresis, Histology and Liquid Scintillation.

**Polyplus transfection**

Reagents for in vitro and in vivo delivery of genes, oligonucleotides, siRNA and proteins.

**Sciencell**

Provides a variety of high quality human and animal primary cells, cell culture media and reagents, gene analysis tools, cell-based assay kits and stem cell products.

**Unisensor**

Improves food safety with screening solutions to detect antibiotics, mycotoxins, food fraud in dairy, cereal, honey, feed, meat and seafood industries.

**Viagen Biotech**

Direct PCR DNA extraction single-tube system for rapid preparation of DNA, compatible with genomic PCR for genotyping, from mous tails, ears, yolk sac and culture cells.
